

Fan unit

If the temperature is set to 25 degrees. When the peripheral temperature of the sensor probe is greater than 25 degrees, the fans start; When the ambient temperature is lower than 25 degrees, the fans stop.

Specification

ITEM	DETAILS DESCRIPTION
Temperature control range:	-50~110°C
Resolution:	0.1°C for -9.9~99.9 other temperature segments 1°C
Color	Black
Product Size	2fans 485*222*45mm/4fans 485*302*45mm
Package Size	2fans 500*250*60mm/4fans 500*320*50mm
Temperature measurement accuracy:	0.2°F
Temperature control accuracy:	0.1°C
Refresh frequency:	2 times per second
Input power:	110V-220V optional
Measurement input:	NTC (B3950= 10k0.5 %) 1 m waterproof sensor
Output type:	relay output, maximum capacity 10A
Environmental requirements:	-30~60°C humidity 20%-85%
